PROJECTS / OPEN-SOURCE

Protfolio | Link   *HTML,Javascript,CSS,Typedjs,web3forms-api*
  A Personal Portfolio is a collection of materials that showcase an individual's skills, experiences, accomplishments, and qualifications. It is often used by professionals, artists, designers, and freelancers to present their work in a visually appealing and organized manner.

AI&DS Department Website | Link   *HTML,Javascript,CSS,Bootstrap*
  Developed a responsive and modern website for the AI & DS department at GSMCOE to showcase faculty profiles, academic achievements, event galleries, and departmental updates. Designed with user-friendly navigation, dynamic content, and mobile-first responsiveness. Deployed on Netlify with version control using GitHub.

Weather Dashboard | Link   *HTML, CSS, JavaScript, OpenWeatherMap API*
  Developed a responsive weather dashboard that enables users to search for any city and view real-time weather data, including temperature, humidity, and current conditions, using the OpenWeatherMap API. Implemented recent search history tracking for improved user experience.

Text to Image Generator (Pixelize) | Link   *REACT.JS ,CSS,API,*
NODE.JS,VITE.JS,MONGODB,RAZORPAY GATEWAY
  Text-to-Image Generator using React.js & ClipDrop API
  A Text-to-Image Generator is a web application that allows users to input descriptive text prompts and generate corresponding AI-generated images using the ClipDrop API. This tool is useful for designers, artists, and developers who need quick visual representations based on textual input.

ChatGPT Clone | Link _REACT.JS CSS, JAVASCRIPT,API,_

A ChatGPT Clone is a web application that mimics the functionality of OpenAIs ChatGPT, enabling users to have AI-driven conversations. This project integrates TodayAI API (or OpenAIs GPT models) to generate responses dynamically based on user input.

GenAI-Powered Financial Assistant | Link _REACT.JS ,CSS,API, NODE.JS,VITE.JS_

Built a conversational AI platform designed to improve financial literacy and investment decision-making for millions of new and aspiring investors in India. The assistant leverages Generative AI to provide real-time, contextual investment insights, addressing both beginner and advanced queries.

Food Delivery Web App | Link _ReactJS, Tailwind CSS, Node.js, Express.js, MongoDB, Razorpay, Web3Forms, Netlify, Render_

Developed Tomato, a full-stack food delivery platform with a seamless and responsive user experience across devices. The project replicates a real-world ordering workflow from browsing dishes to secure checkout. Integrated modern UI/UX, secure authentication, and payment gateway support to deliver a production-ready application.

AI Mental Wellness Companion | Link _React.js, Tailwind CSS, Framer Motion, Netlify_

Built a responsive mental wellness platform leveraging Generative AI to deliver personalized mood tracking, music therapy, breathing exercises, and daily affirmations. Implemented smooth UI/UX with dark/light mode and emotion-based content customization to promote emotional well-being.

Career Aligner | Link _Streamlit, Google Gemini API, Python, PyPDF2, docx, reportlab, Lottie, HTML/CSS/JS_

Developed Career Aligner, a GenAI-powered job application assistant that analyzes resumes against job descriptions for ATS optimization. The tool provides match scoring, highlights missing skills, generates personalized cover letters, and exports improved resumes in PDF/DOCX formats. Integrated Google Gemini 1.5 Flash model for intelligent content generation and built a modern UI with animations and responsive design.
